## EXPERIENCE

### DEVELOPER ADVOCATE (Technical Writing & Community Manager)

Cloudinary | Remote, California | Contract | Dec 2021 - PRESENT

My primary role and responsibilities as a developer advocate and community manager include the following.

- Technical Writing (Content Creation) - Document different Mediajams use cases.
- Community Manager - Increase engagement through active participation in the MediaDevs discord on most channels
- Host bi-monthly MediaDevs meetup on Discord (event Info on Meetup, Hosted on Discord video)
- Organize and speak at events on Jamstack-related topics
- Drive discussions of media challenges/use cases in target developer communities/ecosystems focusing on MediaJams content, with the objective to drive traffic (to both MediaJams & MediaDevs)
- Strategize on improvements to the community and make suggestions during weekly meetings (if resources are needed, to bring up this information)

### Co-founder & Technical Lead

Saadatech | Nairobi, Kenya | Full-Time | March 2019 - December 2021

As a technical founder, my primary roles and responsibilities were as follows:

.

- Software development, modeling, simulation, testing, and quality assurance.
- Perform maintenance and software integrations for existing systems.
- Developing and executing project plans.

- Creating technical specifications.
- Managing the technical team.
